I agree with your proposal, I too think that only Scotland should have the Channel changes so that BBC Four can move up the Guide to a Higher EPG number, EPG Number 24 instead of EPG Number 68

I think it is unfair for the whole of the UK to move Channel Numbers sorry, but I cannot agree with this with you on this one

I think that most channels should stop broadcasting two different version of their channels one on SD and another version on HD

All Muxes should be converted to T2 HEVC ASAP
